

## DRY ICE CLEANER

IB 7/40 Adv (240V | 110V)

The spray process with dry ice pellets is ideal for gentle cleaning of sensitive surfaces. The compact IB 7/40 for in-house compressed air networks ensures impeccable cleanliness, even with 2 bar.

### Technical Specification

| Industrial Vacuum                   | IB 7/40 Adv (240V   110V) |
|-------------------------------------|---------------------------|
| Air pressure (bar/mpa)              | 240/02-1                  |
| Air flow rate (m <sup>3</sup> /min) | 0.5-3.5                   |
| Dry Ice capacity (kg)               | 15                        |
| SDry Ice consumption (kg/h)         | 15-50                     |

#### Clear display

- The values in the settings are easy to read and simple to operate thanks to large buttons and electronic controls.

#### Automatic residual ice emptying

- Residual ice is emptied from the tank with the push of a button once the work is complete, preventing the machine from freezing.

#### Nozzle case bracket

- Spray nozzles and tools are easily accessible from anywhere on the machine.
- The nozzle case is attached to the side of the machine to protect it from contamination.

#### Outstanding mobility

- Optimum machine balancing for manoeuvring over uneven ground comfortably.
- Handles at the front and rear of the machine make it easy to carry on stairs.

makes a difference

## Dry Ice Accessories

Maximising the potential of your Kärcher machine

### Advanced IB gun

Ergonomically and compact IB gun. Includes a safety function to prevent unintentional triggering and an integrated remote control.

### Heavy duty IB gun

Ergonomic and light IB gun with safety switch to prevent unintentional triggering. Switch for selecting "air and dry ice" or only "compressed air".

### Blasting hose

5m or 8 m blasting hose with electric control cable and quick couplings with non-marking outer layer. Silicone-free.

### Ice Blaster Light

Nozzle light is screwed onto the IB gun. For optimum illumination of the spray area.

### Flat jet nozzle

Flat jet nozzle with optimised nozzle geometry. Excellent cleaning results with a high area coverage. Available in various lengths.

### Round jet nozzle

Powerful round spray nozzle with an innovative nozzle contour for maximum cleaning performance and very low air consumption. Ideal for stubborn contamination.

### Angled nozzle

The angled nozzle deflects the spray at a 90° angle. Ideal for cleaning injection moulds and hard to reach areas.

### Nozzle extensions

Available in lengths 170-500mm.

### Scrambler

The patented innovative Scrambler, is mounted between the trigger gun and spray nozzle and breaks up the 3 mm dry ice pellets into fine particles. This makes it possible to clean very sensitive surfaces. There are three pellet breaking force levels.

### Blasting gun handle

Handle for attachment to nozzle extension. For convenient two-hand use. Handle, IB.

### Hose cart

Hose reel including all adapters. This practical tool for dry ice blasting is designed for 80 m long compressed air hoses with a diameter of 1.

### Compressed air hose

The compressed air hose or the Ice Blaster is very light and keeps its shape. Ideal for connecting to the hose reel with the compressor. Available in 5m, 20m & 60m lengths.

### Tools + Grease

To maintain the performance of the machine, the thread of the spray nozzles must be regularly treated with this silicone-free grease.

### Protective equipment

Safety glasses, protective gloves & ear muffs are a must for Ice blaster operation.

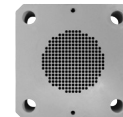

### Dry ice boxes

Expanded polypropylene boxes (EPP) for storage of dry ice.

### Other IB accessories

Mounting kits and other accessories for IB and IP.

### Extruder plate for IP

Extruder plates produce dry ice pellets in various diameters - 1.7mm, 3mm & 16mm.

### IP Weighing unit and timer

Production control system for automatic filling and weighing of produced dry ice.

### Other machines in the range
