

Large-area carpet cleaning made easy:

The new Puzzi 30/4 from Kärcher.

Kärcher's all-new Puzzi 30/4 and 30/4 E provide new levels of convenience and ease of use, thanks to a host of design features all intended to make carpet and upholstery cleaning more productive and therefore quicker and at lower cost. Using the proven spray-extraction method but with the added advantage of Kärcher's revolutionary flexible suction tool, the 30/4 deep cleans carpets and leaves only a market-leading 9% residual moisture. This means that carpets and upholstery are left almost completely dry, reducing the risk of resoiling and enabling cleaned areas to be used again very quickly.

New floor tool design

The all-new handle can be adjusted to suit any operator height without tools, and features two clear windows to monitor cleaning progress. The new rotating plastic lip ensures optimum contact is made with the ground regardless of the angle of the floor tool, dramatically improving ease of use and cleaning results. The optional PW 30/1 powered brush head further increases productivity.

Small footprint

The 30/4 has a very small footprint to make storage and transportation easy, and to enable use in confined spaces. The new removable dirty tank makes emptying and refilling easy and safe.

Convenient refills

The removable dirty tank can be used to conveniently refill the clean water tank.

Easy transportation

The machine has large wheels for easy transportation, and a clean water level indicator.
